PROFILE

B.Tech CSE student with experience in building web and full-stack applications using React, Next.js, and JavaScript. Skilled in backend development, REST APIs, and real-time workflows, with some exposure to AI and distributed systems. Passionate about writing clean code, solving problems, and building practical solutions.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML), 2026
Ramrao Adik Institute of Technology Navi Mumbai, India
CGPA : 9.5 / 10

SKILLS

Programming:

Java,Python,JavaScript

Frameworks :

React.js,Next.js,Springboot,Langchain

Databases & Data Management:

MongoDB, PostgreSQL, ChromaDB

Concepts & Tools:

Docker, GitHub, Git ,Object-Oriented Programming (OOP),Data Structures & Algorithms,RAG, RESTful APIs

Soft Skills:

Analytical Thinking, Insight Generation, Problem Solving, Communication, Collaboration

PROJECTS

AI-Powered Stock Market App(Next.js,MongoDB ,Inngest) Aug 2025

- Built a financial analytics web application using Next.js and MongoDB, featuring real-time stock charts, company insights, and personalized watchlists.
- Implemented event-driven workflows with Inngest to automate welcome emails and daily personalized stock summaries.
- Developed a personalized recommendation engine based on user risk profiles, sector preferences, and watchlist behavior.
- Integrated secure authentication and authorization using Better Auth to support scalable and reliable session management.

Data-to-Insights RAG Assistant(Python, FastAPI, LangChain, Streamlit) Nov 2025

- Developed a RAG-based analytics assistant to enable natural-language querying over CSV and Excel datasets using LangChain, Groq LLM (Llama-3.3-70B), and ChromaDB.
- Engineered an automated data-cleaning pipeline to handle missing values, duplicates, and datatype inconsistencies, ensuring datasets were analytics-ready.
- Implemented 20-row semantic chunking for structured DataFrames, improving context-aware retrieval and reducing irrelevant responses during query resolution.
- Built an interactive Streamlit dashboard with real-time chat, AI-generated insights, and Plotly visualizations, enabling faster exploratory data analysis.

Project Management API (Java,Spring Boot,PostgreSQL,Docker) Apr 2025

- Developed a Spring Boot RESTful API using Java and PostgreSQL to manage projects and software engineers with full CRUD functionality.
- Designed and implemented a relational database schema with One-to-Many mappings and cascade delete to maintain referential integrity.
- Implemented role-based authentication and authorization, ensuring secure access control for different user roles.
- Containerized the application using Docker, improving deployment consistency and environment portability.

CERTIFICATES

- AWS Academy Graduate – AWS Academy Machine Learning Foundations
