Education

Ramrao Adik Institute of Technology, D. Y. Patil Deemed to be University <i>B.Tech in Computer Science and Engineering (AIML), CGPA: 9.27/10</i>	September 2022 – Present <i>Navi Mumbai, India</i>
Lakshya Prep High School and Junior College <i>12th Grade, Percentage: 72.17%</i>	June 2020 – March 2022 <i>Mumbai, India</i>
St. Pius X High School <i>10th Grade, Percentage: 87.60%</i>	June 2009 – March 2020 <i>Mumbai, India</i>

Projects

CNN Based Crop Disease Detection <i>Python, Tensorflow</i>	June 2024 – April 2025
- Developed a custom CNN model for detecting diseases in potato, tomato and bell-pepper plants, achieving 88.9% accuracy, while ResNet-18 and VGG-16 achieved 99.8% and 98.56% respectively. - Built a React.js web app for multilingual image/webcam uploads providing instant disease diagnosis with confidence, cause, precautions, and treatment. . - Evaluated model performance using ROC AUC , accuracy-loss curves, precision, recall and confusion matrix analysis.	
IPL Win Prediction with Data Analysis <i>Python, Scikit-learn, Data visualization</i>	January 2024 – April 2024
- Developed a predictive model for IPL win probabilities and data-driven sports analytics. - Achieved 80.36% accuracy with Logistic Regression, 83.83% with Random Forest Classifier and 98.59% with XGBoost models. - Performed exploratory data analysis (EDA) and visualized key match and team insights to enhance prediction accuracy; deployed the web app using Streamlit.	
Stock Market Application <i>Next.js</i>	August 2025 – November 2025
- Integrated real-time stock and news data using Finnhub and TradingViewing APIs for displaying latest market updates. - Developed AI-powered personalized stock recommendations based on user profile. - Implemented portfolio health scoring and automated notifications via email and WhatsApp using Twilio and Nodemailer.	

Technical Skills & Certifications

Programming Language: Python	AWS Academy Graduate: AWS Academy Machine Learning Foundation
Tools: Git, GitHub, MySQL, Power BI	AWS/edX: AWS Cloud Technical Essentials
Technologies: Machine Learning, Deep Learning	Deloitte/Forage: Data Analytics, Technology Simulation
	edX: Building AI Agents with RAG and LangChain
	Google/edX: Google AI for Anyone
	IBM/edX: Generative AI for Business Leaders
	IBM/edX: Models and Platforms for Gen AI

Extracurricular

Tesco Hackathon - Participant	November 2025 - Present
◦ Developing a GenAI-powered prototype website that enables advertisers to create multi-format retail media creatives with a visual builder, reducing reliance on agencies for small and mid-sized brands.	
Amazon ML Hackathon - Participant	September 2024
◦ Developed a feature extraction machine learning model to extract key product attribute values (e.g., weight, volume, wattage) from images for the Amazon ML Challenge 2024, collaborated with team members to build prototypes.	
Trinity College London – Achieved Level 3 recognition in Electronic Keyboard	July 2017

Hobbies

Music, Playing the Electronic Keyboard, Reading, Cricket, Cycling
