Education

Ramrao Adik Institute of Technology, D. Y. Patil Deemed to be University

B.Tech in Computer Science and Engineering (AI and ML), CGPA: 9.05/10

Aug 2022 – Present

Navi Mumbai, India

Arya Gurukul International Junior College of Science and Commerce

12th Grade, Percentage: 63.17%

Jul 2020 – Apr 2022

Navi Mumbai, India

Rainbow International School

10th Grade, Percentage: 81.5%

Jun 2018 – Mar 2020

Thane, India

Projects

T20 world cup cricket data analytics– Cricket Analysis | *Python, Web scrapping, Pandas, Power BI*

Oct 2023

- Created a Power BI report to identify top 11 players for a T20 cricket team by scraping data from espnricinfo with a Brightdata website tool, cleaning and transforming the data with pandas, and evaluating various player performance metrics.
- Used the resulting Power BI dashboard to select players for various categories (openers, middle order/anchors, finishers, all-rounders, specialist fast bowlers) and ultimately choose the top 11 players to play in the match.
- Selected team using the Power BI dashboard has 90% of chances to win the game.

Post-Disaster Damage Classification | *Python, TensorFlow, Keras*

Apr 2025

- Trained a ResNet50V2 model on disaster imagery with 61% accuracy across 3 damage classes.
- Applied transfer learning to reduce training data needs by 40%.
- Trained and evaluated model on over 3,000 satellite image pairs, ensuring high accuracy on multi-class damage classification using paired pre- and post-disaster data.

Black-Scholes Model | *Python, Streamlit*

Jul 2025

- Developed an interactive Streamlit dashboard to visualize Black-Scholes option pricing for call and put options in real time.
- Implemented dynamic heatmaps showing option prices based on varying spot price and volatility inputs.
- Used Python with NumPy, SciPy, Matplotlib, Seaborn, and Plotly to compute prices and render high-quality financial visualizations.

EEG Motor-Movement Classification | *PyTorch, Python, CNNs, Signal Processing*

May 2025

- Built an EEG motor-imagery BCI pipeline in PyTorch, processing 1000+ EEG samples across subjects for classification.
- Optimized preprocessing and CNN training workflow also reduced training time by 30% using GPU acceleration.
- Achieved 85% classification accuracy and improved validation performance by 15–20% after hyperparameter tuning.
- Implemented structured logging + reproducibility setup (configurable experiments, model saving, confusion matrix tracking) improving experiment traceability by 100

Technical Skills & Certifications

Languages: Python, Java, C++

Frameworks: TensorFlow, Keras, PyTorch, Numpy, Pandas

Tools: Git, SQL, AWS, Power BI, Excel

Technologies: Deep Learning, AI, Machine Learning, Data Visualization, Time Series Forecasting,

AWS for Machine Learning: Certificate

EDX: AI for Everyone: Master the Basics, Data Engineering Basics for Everyone

100X Devs - Web Development: Certificate

Extracurricular

Amazon ML Hackathon

Sept 2024

Participated

- Developed a machine learning model to extract product attribute values (e.g., weight, voltage) from images for the Amazon ML Challenge 2024.

Flipkart Grid 6.0 Hackathon

Aug 2024

Participated

- Participated in Flipkart GRiD 6.0 hackathon, solving an e-commerce-focused technical MCQ round covering core computer science concepts.

Hobbies

Programming, Chess, Reading, Gaming, Swimming
